

# ALERT

## You could be eating **Genetically Modified Salmon!**

The world's first genetically modified (GM or genetically engineered) fish is now on sale in Canada — **BUT IT'S NOT LABELLED!**

Ask your restaurant and grocery store for a pledge not to sell the GM Atlantic salmon.

Ask your restaurant and grocery store for a pledge not to sell the GM Atlantic salmon.

The GM Atlantic salmon has been genetically modified with a growth hormone gene from Chinook salmon and genetic material from ocean pout, to grow faster.

**There is no mandatory labelling of GM foods in Canada**, and the GM fish was put on the market without any public notice or product announcement.

On August 4, 2017, the GM fish company AquaBounty revealed that it had already sold almost five tonnes of GM Atlantic salmon fillets in Canada. It will not say where they were sold.

The GM salmon eggs are produced in PEI - and shipped to Panama to grow into fish. But the company AquaBounty wants to build a GM fish factory in PEI at Rollo Bay!

**This is the world's first sale of GM fish for human consumption.**
